## THE PUREST FORM OF LUXURY™

Based in Montreal, Canada and with over 25 years of experience manufacturing premium bathroom fixtures for luxurious residential, condominium and award winning hospitality clients, WETSTYLE is shaped by a passion for design and superior quality supported by unrelenting attention to detail.

Through a marriage of exceptional craftsmanship and our proprietary environmentally friendly material, WETMAR BIO™, WETSTYLE focuses on bathroom fixtures that inspire, delight and rejuvenate.

## WETMAR BiO™

WETSTYLE is proud to offer the industry's purest and most environmentally friendly material. An industry first and 2015 Green Good Design winner, WETMAR BiO™ is an eco-friendly thermo-insulating material that displaces the petro-chemical additives in heavy use in the industry with a recipe composed of Mother Earth's natural ingredients—soy and mineral stone.

All WETSTYLE bathtubs, wash basins and shower receptors are made of WETMAR BiO™.

WETMAR BiO™ is offered in True High Gloss™, Matte and custom color finishes

Green GOOD Design Award 2015

Antislip

The high natural mineral content provides strength, durability, slip resistance and natural thermo-insulation

Thermal insulation

The thermo-insulating properties of the material permit less energy consumption to warm up the bath water and provide a higher level of heat retention than acrylic based products

UV resistant

WETMAR BiO™ is non-porous, stain-resistant, UV resistant, easy to clean, renewable, hygienic and much more solid yet pleasant to the touch than pure plastic (acrylic) based materials

Repairable

Scratches and abrasions can be easily sanded and buffed out returning product to its original lustre

Lightweight

The proprietary blend of light weight ingredients improve thermo-shock performance over competing products and add improved flame retardancy while simultaneously decreasing overall weight to size ratio of the product (notable for projects)

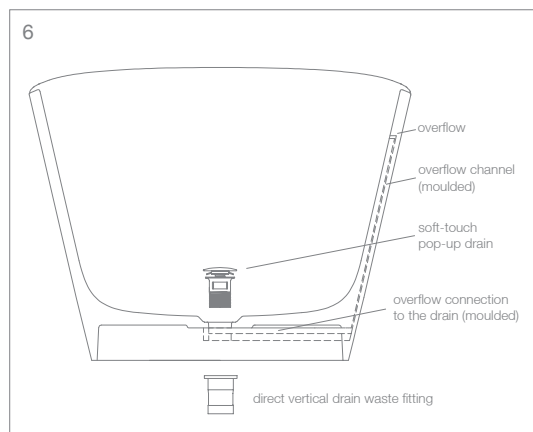

Seamless

One seamless part, no joints or seams for water to escape or leak

## ADVANCED FEATURES

- 1 Slot Design Overflow
- 2 Integrated Overflow – overflow is built into tub wall, providing a cleaner look and saving installation time and related costs
- 3 3" clearance underneath the bathtub for ease of access for plumbing connections
- 4 Oak wood bridge in wenge shade included ; when applicable
- 5 Soft toe touch drain included
- 6 Plug & Bathe™ installation system
  - a Uniquely enables installation and service completely from above
  - b Reduces overall cost of installation
  - c Increases installation possibilities and ease of serviceability

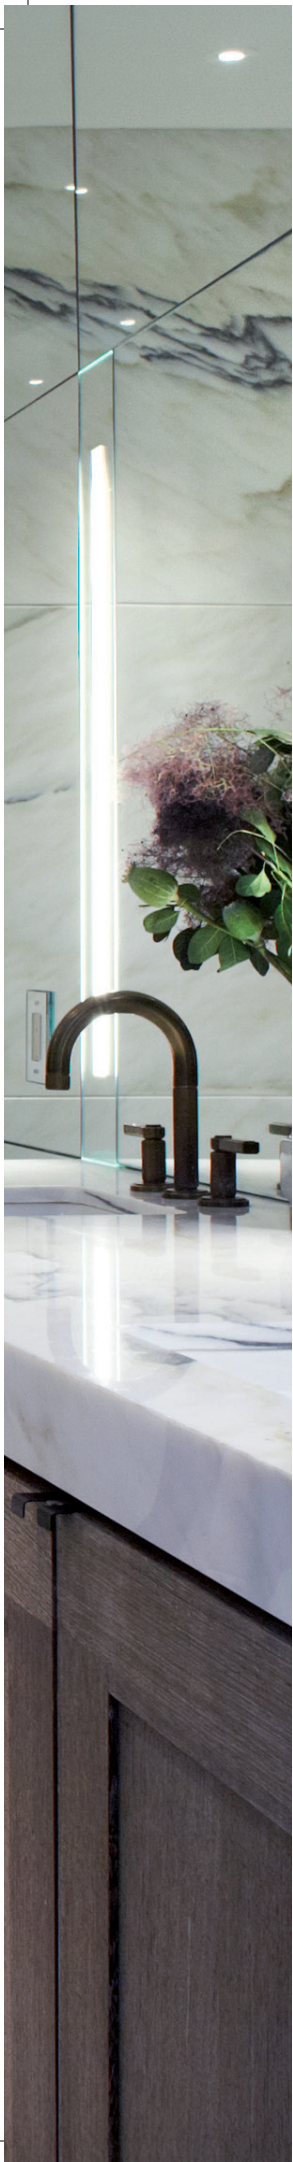

A man wearing a white protective suit is shown in profile, leaning over a white surface. He is using a small, dark, cylindrical tool to work on the surface. The background is dark, and the lighting highlights the texture of the suit and the smoothness of the surface.

# Craftsmanship

WETSTYLE products are made in the WETMAR BIO™ factory in Montreal, Canada where attention to detail, quality and service are overseen by over 100 years of collective experience
